Here is a follow message the client sent me:
Hi! Research tools we use:

Qualtrics - I love their statsIQ function;

SPPS or R

MaxQDA

Atlas.ti
We've used Tableau for its map feature but it bothers me I actually do it by hand and get better results
I literally color maps by hand via procreate on iPad or via adobe Illustrator
https://www.mapresources.com/
I license my maps from here. So helpful they're easily clickable with adobe

Hi Chris,

Following up with a few of the materials we discussed yesterday during our sync.

Attached in this root directory is the "toolkit" we sent to all local associations, outlining the purpose of the Impact Survey and the intention behind each section. It also includes all the questions we asked.

Attached in this root directory is a PDF of the survey downloaded from Qualtrics.

We'll follow up with info on the qualitative interview coding softwares we use.
